Final Roles

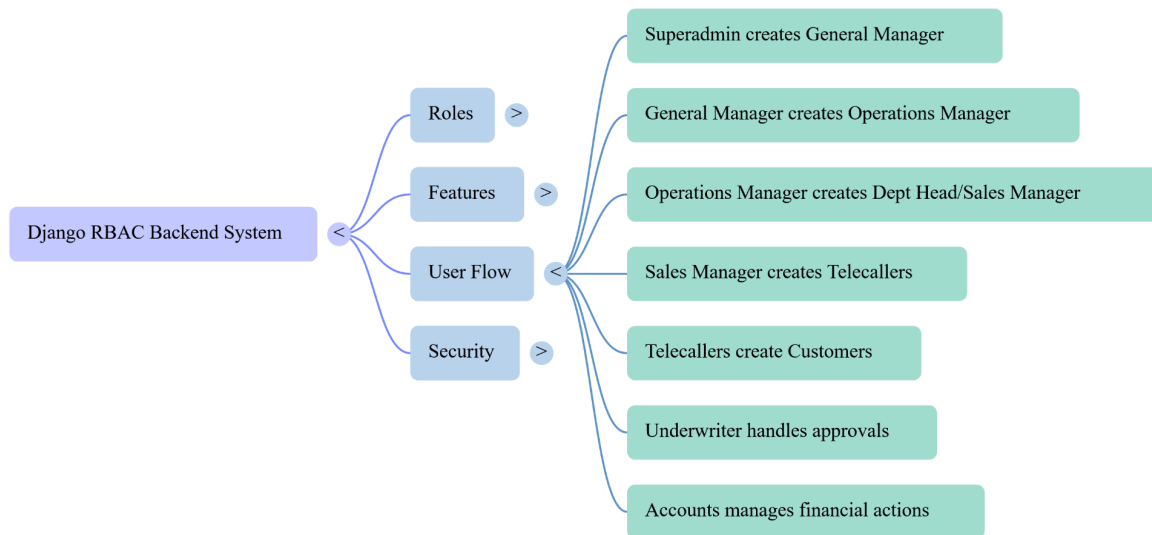

Note: Major architecture flow for the system

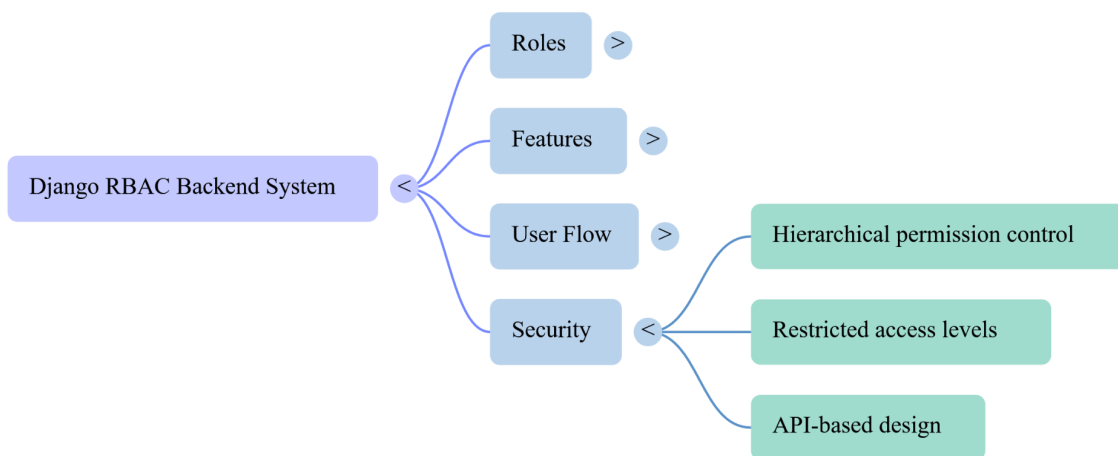

User roles details

Features and flow descriptions

User flow and access details

[models.py](#)

```

from django.contrib.auth.models import AbstractUser
from django.db import models

```

```

class Role(models.Model):
    ROLE_CHOICES = [
        ('SUPERADMIN', 'Super Admin'),
        ('GENERAL_MANAGER', 'General Manager'),
        ('OPERATIONS_MANAGER', 'Operations Manager'),
        ('DEPARTMENT_HEAD', 'Department Head'),
        ('UNDERWRITER', 'Underwriter'),
        ('SALES_MANAGER', 'Sales Manager'),
    ]

```

```

        ('TELECALLERS', 'Telecaller'),
        ('ACCOUNTS', 'Accounts'),
        ('CUSTOMERS', 'Customer'),
    ]

```

```

name = models.CharField(max_length=30, choices=ROLE_CHOICES, unique=True)
level = models.IntegerField()

```

```

def __str__(self):
    return self.name

```

```

class User(AbstractUser):
    role = models.ForeignKey(Role, on_delete=models.SET_NULL, null=True)
    phone = models.CharField(max_length=15, blank=True, null=True)
    is_verified = models.BooleanField(default=False)

```

Roles hierarchy

```

ROLE_HIERARCHY = {
    "SUPERADMIN": 1,
    "GENERAL_MANAGER": 2,
    "OPERATIONS_MANAGER": 3,
    "DEPARTMENT_HEAD": 4,
    "UNDERWRITER": 5,
    "SALES_MANAGER": 6,
    "TELECALLERS": 7,
    "ACCOUNTS": 6,
    "CUSTOMERS": 8,
}

```

Role validation

```

from rest_framework.decorators import api_view
from rest_framework.response import Response
from django.contrib.auth import get_user_model
from .models import Role

```

```

User = get_user_model()

@api_view(['POST'])
def create_user(request):
    creator = request.user
    data = request.data

    try:
        role = Role.objects.get(name=data['role'])
    except Role.DoesNotExist:
        return Response({"error": "Invalid role"})

    if creator.role.level >= role.level:
        return Response({"error": "Cannot create equal/higher role user"}, status=403)

    user = User.objects.create_user(
        username=data['username'],
        password=data['password'],
        role=role,
        email=data.get('email')
    )
    return Response({"message": "User created", "user_id": user.id})

```

ROLE BASED PERMISSION

Action	Allowed Roles
Create Any User	SUPERADMIN
Create Manager	GENERAL_MANAGER
Create Staff	OPERATIONS_MANAGER
Create Telecaller	SALES_MANAGER
Create Customer	TELECALLERS
Approve Claims	UNDERWRITER / MANAGER

Financial Approval	ACCOUNTS
View Reports	ALL (restricted data)

NOTE: ACCESS EXAMPLES JUST FOR REFERENCE CONFIRM WITH ASNY MISS FOR FINAL ACCESS LIST

SUPERADMIN → full control

GENERAL_MANAGER → manage all except superadmin

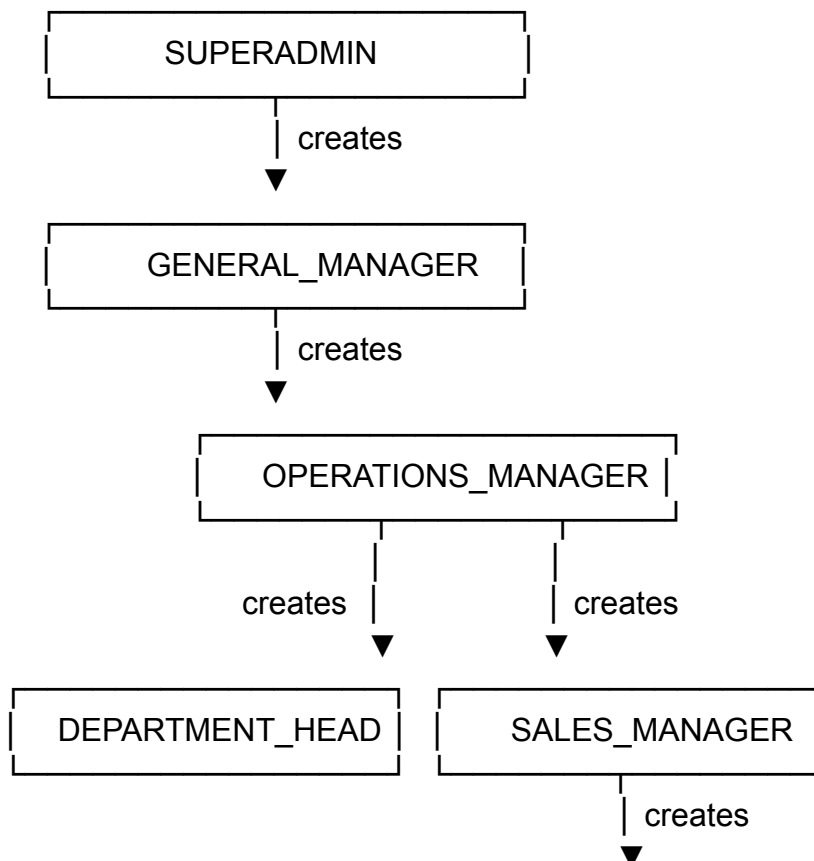

OPERATIONS_MANAGER → manage teams

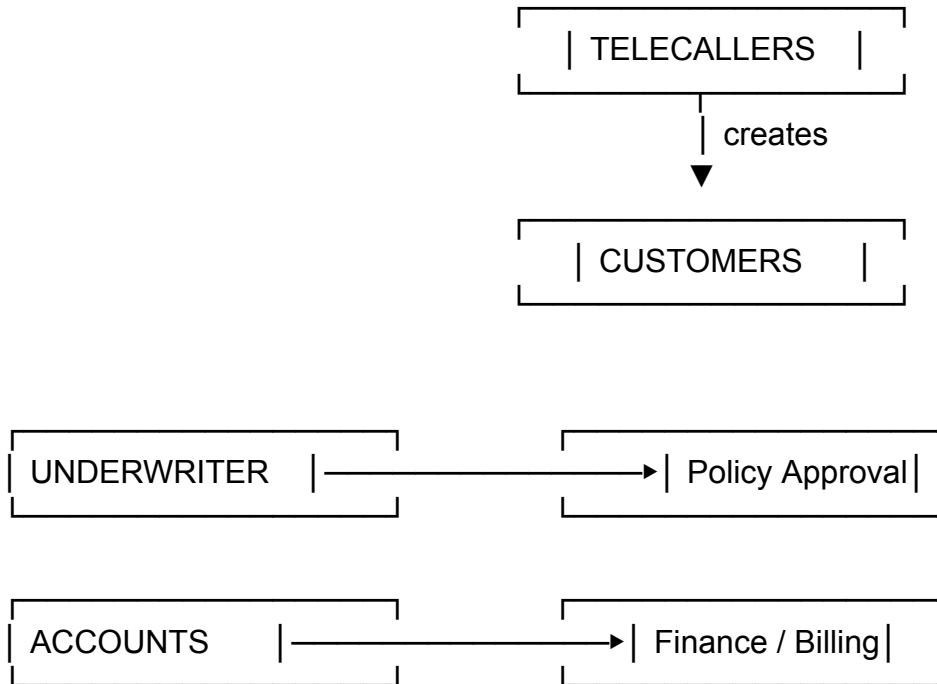

SALES_MANAGER → manage telecallers & customers

TELECALLERS → create customers only

ACCOUNTS → financial access only

FLOWCHART:

SUPERADMIN (Top Authority)

- Full system control
- Creates **General Managers**
- Can override any role
- Manages system-level configurations

GENERAL_MANAGER

- Oversees entire business operations
- Creates:
 - Operations Manager
- Responsible for:
 - Strategic decisions
 - Monitoring departments

OPERATIONS_MANAGER

- Controls execution layer
- Creates:
 - Department Head

- Sales Manager
- Responsibilities:
 - Workflow management
 - Team coordination

DEPARTMENT_HEAD

- Manages specific department (Claims, Support, etc.)
- Does NOT create lower sales roles
- Works with:
 - Underwriters
 - Operations

SALES_MANAGER

- Leads sales team
- Creates:
 - **Telecallers**
- Responsibilities:
 - Lead generation
 - Sales performance

TELECALLERS

- Frontline users
- Create:
 - **Customers (Policyholders)**
- Responsibilities:
 - Customer onboarding
 - Data entry
 - Lead conversion

CUSTOMERS

- End users (policy buyers)
- Cannot create users
- Can:
 - Buy policies
 - Submit claims

- Interact with system

UNDERWRITER

- Does NOT create users
- Handles:
 - Policy validation
 - Risk assessment
 - Approval/rejection

ACCOUNTS

- Handles:
 - Payments
 - Refunds
 - Billing
 - Financial approvals
